

Gen 3 HyperFire (G3HFCB) User Guide

1. Included:

Cable Box (base & cover),
(1) Ground Stake,
(2) Bolts, Washers &
7/16 Nuts,
(1) 1/4 x 20 Thumb Screw.

2. Push the Ground Stake into the ground. Then fasten the stake to the Cable Box using the included Bolts, Washers & Nuts. **Be sure the nuts are in the inside of the box.**

3. Mount the camera to the mounting tab inside the Cable Box housing using the included Thumb Screw.

4. To close the cable box, line up the tabs of the cover with the slots in the base.

5. You can use a padlock on the back of the cable in order to secure the camera.

NOTE: When using a Reconyx Cellular Camera with the cable box, the antennas can either extend out of the top, or you can use a puck antenna mounted to the top of the cable box.

Mounting Options

1. Use a "Duckbill Anchor" to secure the HFCB.
2. Cement the mounting stake in the ground.
3. Create a cement block on the bottom of the stake and bury the cement block when dry.

Warning!!

Be aware of any underground cables or utilities when installing the Cable Box Stake.
